Light is important. Give as much strong light as possible without burning leaves, otherwise colors will not be bright.

Temperature should be 80 to 85 degrees, the higher the better. Reduce heat gradually to harden off plants. Start the bulbs in flats and place on steam flows if possible.

Water sparingly until sprouts and roots are 4 to 6 inches long, then shift to 5 or 6 inch pots. Never allow the pots to dry out when in full growth.

3 Answers to 3 Problems

① DO YOU want better propagation results?

Here is an ideal growth stimulant which has solved the rooting problems of many growers. This powder comes in ONE strength only and may be used effectively on ALL types of cuttings. Besides acting as rooting aid, it follows through by supplying all the vital elements needed during this difficult period.

Just dip the base of each cutting in the powder and plant as usual. It is economical to use and acts as an added stimulus to start healthy and vigorous root growth. Seeds may be quickly coated by sprinkling them with this powder.

2 oz. \$1.00

1 lb. \$4.50

Also available in concentrate form to make solution.

② DO YOU want green, healthy foliage?

Are the leaves of your plants yellow and dropping off? This may be a sign of chlorosis due to iron deficiency. JIMP gives them a "transfusion" and helps restore that healthy green look. It contains chlorophyll in an easily soluble iron compound plus vital elements. Results are quick and lasting. Wonderful for azaleas, geraniums, etc.

Can be used as spray for the foliage or applied dry to the soil around the base of plants. One pound makes 6 gallons of solution.

4 oz. trial \$1.25

10 lbs. \$25.00

1 lb. \$3.00

25 lbs. \$57.50

③ DO YOU want to overcome soil toxicity?

Treat your soil with DOVOL to overcome nitrite toxicity and supply oxygen for soil aeration. This special horticultural hydrogen peroxide supplies free oxygen to the roots and converts toxic nitrites to the more beneficial nitrates. DOVOL also destroys some of the harmful bacteria usually found in poorly aerated soils. Especially recommended for treating soil or sand media in flats or benches prior to planting seeds or cuttings. Use one pint of DOVOL for 10 gallons of water.

Since the HILLMAN METHOD was introduced three years ago, hundreds of letters have been received from nurserymen and florists who have used HILLMAN Wreath Machines to speed up evergreen wreath production, thereby reducing costs and boosting profits. These letters, plus statements from a large group who tested the latest HILLMAN METHODS for making Garlands (Roping), Floral Sprays, and Grave Blankets, offer enthusiastic proof that the HILLMAN METHOD can boost profits for you, too.

"The HILLMAN Garland (Roping) Clips have made the production of thousands of feet of holiday roping a cinch with more money in the register."

"Since my introduction to your clips and wreath-making machine last December, I have been recommending it to all wreath-makers I meet. I just rave about it because it's wonderful to use and a great time saver."

"... easy operation of the HILLMAN machine has permitted us to use unskilled help at great savings in labor cost."

"The HILLMAN Grave Blanket Kit was introduced at the perfect time for us. The increasing demand for Grave Blankets can be met easily and profitably with the use of your method."

"Our HILLMAN Wreath Machines have paid for themselves a hundred times during two Christmas rush seasons."

"I have seen your machine and rings in use by a nearby florist, and was impressed by its simplicity and speed. Please accept my order . . ."

WITH THE

Hillman

METHOD

Floral Sprays

made quickly and firmly

Beautiful, firm floral sprays may now be made faster and better with the use of inexpensive Hillman Floral Spray Bars. Use of the Hillman Wreather Machine is optional since the Floral Spray Bars have clips of dead-soft wire which may be locked over flowers and greens by hand. The Hillman Method of making floral sprays eliminates the tedious jobs of . . .

- preparing a base
- picking flowers and greens

Make your floral sprays following these simple steps and complete the spray as you proceed (only those flowers needed for height should be wired).

- STEP 1.** Place desired amount of flowers, ferns and greens in first clip.
- STEP 2.** Close clip by hand or with the Hillman Wreather machine.
- STEP 3.** Add flowers and greens in each succeeding clip and close.
- STEP 4.** When last clip is reached, reverse flowers and greens in last clip and close.
- STEP 5.** Place ribbon.

Grave Blanket Kit

opens profitable new field

Now, Hillman introduces the new Grave Blanket Kit which will let you

- quickly make a blanket of standard size.
- fasten evergreens more securely.
- anchor the blanket to the ground whether lying flat or "mounded".
- rapidly produce blankets that are flexible for ease of handling and delivery in car or truck.

MAKING GRAVE BLANKETS WITH THE HILLMAN METHOD

STEP 1. Attach three cross braces to main clip bars with tie-wires provided so that completed form looks like illustration 7.

STEP 2. Attach greens to main clip bars alternating from one side to the other. Start from both ends and work to center. Make sure that only the center stem of each bough is fastened to allow natural spread of branches.

STEP 3. Add decorations as desired to finished blanket. See illustration 8. De Luxe Grave Blanket Kit includes extra wire and "hairpins" for addition of decorations.

NOTE: Do not open anchor "legs" until ready to place blanket on grave.

DELUXE AND STANDARD KITS AVAILABLE

DELUXE KIT — contains 2 wire clip bars 48" long with soft wire clips for fastening greens; 3 wire braces 24" long (plus 4" fold-over ends on each for anchoring frame in ground.); 2 light 30" wires complete with small clips for decorating blanket with red ruscus, statice, etc. (These wires may be bent into numerous shapes); 12 HILLMAN "Hairpins" to fasten decoration to blanket.

STANDARD KIT — Same as above, less two 30" decorating wires and 12 HILLMAN "Hairpins".

NOTE: Special decorations, such as crosses of red ruscus, can be made in advance of your season and added when grave blankets are made.

Garlands can be made faster with the HILLMAN Garland Clip

Old, time-robbing, inefficient methods of making holiday garlands (roping) can now be eliminated with the use of Hillman Garland Clips. Available in three sizes, Hillman Garland Clips ensure maximum results in making garlands (roping) without using costly skilled labor. Production can easily be doubled.

When ordering Garland Clips be sure to specify size.

1" CLIP FOR LIGHT WEIGHT GARLANDS
(lycopodium, cedar, etc.)

1 1/2" CLIP FOR MEDIUM WEIGHT GARLANDS
(hemlock, laurel, etc.)

2" CLIP FOR HEAVY WEIGHT GARLANDS
(spruce, balsam, and similar heavy materials)

Using the Hillman Wreather Machine to make Garlands follows similar steps in wreath-making:

- STEP 1.** Adjust jaws to size of clip. Set jaws slightly smaller than clip to ensure a snug fit.
- STEP 2.** Place clip in jaws. Surround base (rope or wire) with desired amount of greens and set inside clip. Press foot pedal to lock clip.
- STEP 3.** Set clips from 3 to 5 inches apart depending on evergreens used. Continue above operation until desired length is reached.

Using the Hillman Method in making garlands (roping) requires boughs that are longer than those used in making hand wrapped garlands. For example, use ten to fifteen inch boughs rather than those six to eight inches long.

Hillman

METHOD

THE Hillman WREATHER MACHINE GIVES **YOU FASTER PRODUCTION and BETTER WREATHS** **with LESS WORK and GREATER PROFIT!**

If you have a small florist shop or if you are a wholesale florist or nurseryman, you'll appreciate the value of the Hillman machine. This is a machine that anyone can operate, thereby reducing your need of costly skilled labor. Whether you turn out a few wreaths, floral sprays, garlands (roping), grave blankets, etc. . . . or 10's of thousands, the Hillman machine eliminates headaches and hard work . . . increases production and profits.

Here at last is the answer to the problem of meeting heavy demands, during the Christmas season especially, for wreaths and other decorations . . . demands that pile up when there are never enough hours in your day.

SIMPLE TO SET UP

Insert your Hillman machine into a table slot (photo 1) . . . or clamp it to the outside of a bench (photo 2). Assembly of the machine is a simple operation by following instruction sheet provided with each machine.

SIMPLE TO STORE AWAY

The Hillman Wreather Machine is completely portable. When not in use it may be taken down quickly and easily . . . and may be stored or carried in its specially designed, compact carton. It is never in the way.

NEW DEVELOPMENTS FOR 1953!

IMPROVED LINKAGE NOW ON BOTH HILLMAN MODELS

Strong, steel links from foot pedal to jaws on standard Model "A" and heavy-duty Model "B", now give positive, direct-line pressure to assure you smooth operation and lifetime use under normal conditions. Steel links are adjustable to any standard bench height.

IF YOU NOW OWN A HILLMAN MACHINE . . .

you may have — free of charge — the new steel links to replace the original cable simply by writing for them . . . they'll be sent to you prepaid.

▲ MODEL "A" ▲

MODEL "B" ▲

NEW MODEL "B" FEATURES SUPER-JAWS FOR HEAVY WORK

A new, extra heavy duty machine, Model "B", has been added to the Hillman line. Model "B" is identical in principal to Model "A", but has been designed with larger jaws and heavier construction for heavy duty work and large volume production.

CONVERT YOUR MODEL "A" to MODEL "B" at LOW COST

If you are using standard Model "A" but wish to do heavier work in larger volume, convert to Model "B" by replacing present jaws with new Model "B" jaws at low cost.
